FPT POLYTECHNIC

Major: Information Technology – Software Applications

2020 - 2023

- GPA: 8.6/10
- Graduated with Distinction

WORK EXPERIENCE

WANOSOFT Co., Ltd.

11/2024 - nay

Business Analyst

Participated in an outsourcing project for a government-sector technology partner, working directly with department managers to gather requirements, conduct market research, and develop AI-powered product features that enable users to aggregate cross-platform data, analyze information, and assess cybersecurity risks and impacts.

Project: AI Chatbot - Cybersecurity Analysis

- Gathered, analyzed, and clarified business requirements from Stakeholders, End Users, and Product Owners.
- Translated business requirements into User Stories, Acceptance Criteria, BRDs, PRDs, and Functional Specifications.
- Modeled business processes using BPMN, UML Use Case Diagrams, and Business Flow diagrams.
- Managed Product Backlog and supported Sprint Planning, Sprint Review, and Sprint Retrospective in Agile/Scrum.
- Monitored development progress using Jira while collaborating closely with Development and QA teams throughout the SDLC.
- Conducted User Acceptance Testing (UAT) and supported feature deployment for AI-powered data analysis and cybersecurity risk assessment.

Product Executive

Worked closely with customers and stakeholders to research the Homestay and Hotel Management industry, gather product requirements, prepare documentation, design wireframes, and coordinate product development with cross-functional teams.

Project: KVBooking Hotel - Hotel and Homestay Management Software.

- Conducted market research and competitor analysis in the Homestay and Hotel Management industry.
- Gathered business requirements from customers and stakeholders.
- Transformed requirements into User Stories, Use Cases, and Functional Requirements.
- Designed Business Flows, BPMN diagrams, and Wireframes.
- Collaborated with a cross-functional team of approximately 10 members, including Developers, QA Engineers, and UI/UX Designers.
- Supported User Acceptance Testing (UAT), Product Demonstrations, and feature deployment.

NOVAON DIGITAL JSC

Business Analyst

Managed and contributed to the development of 4 products and 3 technology services. Conducted market and competitor research across digital advertising and social media platforms while collaborating with cross-functional teams to define product requirements, prepare documentation, design wireframes, and coordinate product development.

Project: OnHub – Social Media Account Management Platform

- Participated in business analysis and product development for four MarTech products and three Digital Advertising services.
- Collected requirements from customers, Business Development teams, and stakeholders.
- Analyzed business needs and proposed solutions aligned with business objectives.
- Produced PRDs, Functional Specification Documents (FSD), User Stories, and Acceptance Criteria.
- Designed Wireframes, User Flows, and Business Process Flows.
- Collaborated with the CTO, Product Team, Developers, and QA throughout product development and deployment.
- Conducted UAT, supported user training, and collected feedback for continuous product improvement.

SKILLS

Business Analysis

- Requirement Elicitation & Requirement Management
- Stakeholder Management
- Business Process Analysis
- Gap Analysis
- Impact Analysis

Documentation

- BRD (Business Requirement Document)
- PRD (Product Requirement Document)
- Functional Specification Document
- User Stories, Acceptance Criteria, Use Case Specification

Methodologies

- Agile/Scrum: Sprint Planning, Sprint Review, Sprint Retrospective, Backlog Grooming

Business Process Modeling

- BPMN 2.0
- UML Use Case Diagram, Activity Diagram, Sequence Diagram, Business Flow Mapping

Tools

- Jira, Confluence
- Draw.io, Figma, Balsamiq

Technical Skills

- SQL
- REST API
- JSON
- AI-assisted Business Analysis

Design Skills

- UI/UX (Prototype, Wireframe)

Languages

- English: Reading & understanding technical documentation
